

HOLLAND  
HEALTHCARE®

Dear Dental Practices,

My name is Dr. Richard Simpson, and I am a board certified pediatric dentist practicing in Tuscaloosa, Alabama. I would like to personally introduce you to the **TelScope Telehealth System** by Holland Healthcare. This system converts any smart device into a **cordless intraoral camera** that **illuminates the throat and oral cavity, retracts, and captures & stores exceptional quality still images and video** that can be uploaded into a patient's electronic chart or **transmitted securely to other healthcare providers.**

Through my experiences as a past Chair of the Oral Health Coalition of Alabama, the dental liaison to the Alabama Chapter of the American Academy of Pediatrics, and as a dental specialist receiving patient referrals from fourteen dentally underserved & rural counties, I have seen the **tremendous potential for teledentistry to enhance access & provision of oral health services.**

The TelScope Telehealth System and its ability to serve as a **low-cost, high-quality imaging system** for in-office or remote oral health services is the **missing link for imaging that any mobile, remote, or inter-professional & patient-provider telehealth scenarios have needed.**

The TelScope Telehealth System is **uniquely suited for rural healthcare environments** where patients, primary care providers, dentists, & specialists may be geographically distant from one another. The TelScope can be used in urgent care or emergency departments, primary care offices, dental offices, CHCs, and skilled nursing facilities to facilitate **clear communication & documentation of intraoral, throat, & dental examinations.** This streamlines care for patients and allows providers the ability to confidently perform more complete in-person or telehealth visits, facilitate care & referrals, & subsequently receive adequate reimbursement for these services provided.

Sincerely,

Richard A Simpson, DMD, FACD, FICD  
Diplomate, American Board of Pediatric Dentistry  
Chief Clinical Officer, Holland Healthcare
