

TELSCOPE TELEHEALTH SYSTEM

Examine.
Capture.
Connect.

TelScope Telehealth System is the **intraoral examination device** that transforms any smart device into an **intraoral camera** to capture superior image and video for **telehealth connectivity**.

Intraoral Examination and Capture

TelScope retracts & depresses, & places the **source of illumination inside the oral cavity** for an accurate intraoral examination.

The **lightweight, portable** handle attaches to your smart device & works together with the TelScope App to capture **superior intraoral image and video**. Then, **securely** send files **instantly**.

Bridging the Gap

TelScope Telehealth System connects oral concerns between **patient & provider**, **provider & specialist**, or for **patient files and triaging** - anywhere, anytime.

TelScope promotes medical-dental integration for better patient outcomes.

TelScope
Telehealth System
works in just
3 simple steps:

EXAMINE

CAPTURE

CONNECT

TELSCOPE TELEHEALTH SYSTEM

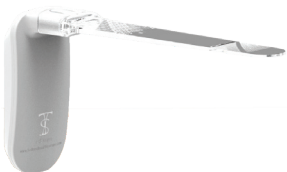

TelScope is the **telehealth** device + app combination that **examines** inside the mouth & transforms any smart device into an **intraoral camera**.

EXAMINE

Examine with the TelScope illuminating depressor.

- **Remote patient monitoring:**
Device portability allows exams with homebound patients
- **Hygienically secure: Antimicrobial** handle & single-use depressors reduce risk of cross-contamination
- **Accurate** oral diagnoses, as **light source is placed directly in the mouth**
- **Rechargeable** handle

CAPTURE

Capture a telehealth image or video with any smart device using the TelScope app.

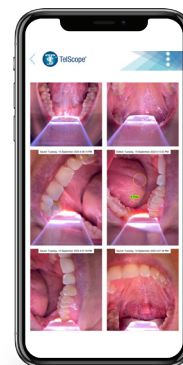

- **Universal** handle attaches to **any smart device** to work together with the **TelScope medical app**
- Transforms any smart device into an **intraoral camera** to easily capture a **superior quality intraoral image or video**
- **Measure** & **annotate** areas of concern

CONNECT

Connect the image or video to a specialist or EMR system.

- **Securely connect** intraoral images & videos to a specialist or to a medical or dental professional
- Organize & **securely save** images & videos for patient files or electronic medical record
